## XPlane 11

Article No. Box	13900
Article No. Download	13966
Genre	Flight simulator
Format	DVD
Publisher	Aerosoft
Developer	Laminar Research
EAN	4015918139007
Box Price	69,99€
Download Price	65,95€
Language	English

## Product description

XPlane 11 is the latest version in the flight simulator series for Windows, Mac, and Linux systems. In this simulator, there is a whole world to discover. Thanks to its open structure, all users and enthusiasts can change every single part of it and adapt it to their preferences.

The 11<sup>th</sup> edition of XPlane offers a much more realistic and immersive experience. A new rendering engine makes the whole world appear in a new light – literally. Due to “Physically Based Rendering”, illumination and reflections behave in physically correct ways and change depending on viewing angle and the object’s surface. This technique works dynamically which means that graphical effects no longer have to be prerendered. It was also developed with very good performance in mind.

In the completely redesigned user interface, the control setup, aircraft, airports and weather options are now presented with a visual preview which makes editing them a breeze. The simulator can now be controlled much more intuitively thanks to this well thought-out menu structure.

Furthermore, XPlane 11 features a brand new sound engine that realizes 3D surround sound with high quality samples. This works on a global scale resulting in spatially correct audio placement of any aircraft and any object within the scenery while also taking the current location of the user into account. The sound engine is fully usable and extendable by third-party add-ons.

The content of XPlane 11 is also considerably expanded. Numerous new aircraft with 3D cockpits and extensive documentation are available to the virtual pilot; add to that more than 3000 airports with 3D buildings, static aircraft and dynamic environments.

The global scenery sees new cities specific to Europe and North America and an update to its overall layout based on recent Open Street Map material.

Considering all this, XPlane 11 is the most modern flight simulator – still a simulation, but closer to reality than ever before!

#### **Features:**

- Brand new user interface and controls setup
- New aircraft with 3D cockpits plus detailed documentation
- Now with over 3,000 airports with 3D buildings
- Airports populated with static aircraft plus dynamic airport environments
- New rendering engine for enhanced lighting and water effects
- New city scenery specific to Europe and North America
- Latest road placement and global scenery from Open Street Map

#### **Minimum system requirements:**

- Windows 7 / 8 / 10 (64 Bit), Linux or Mac OS X 10.10\*
- Processor (CPU): Dual Core i3, i5, i7 at 3 GHz or faster
- Min. 8 GB RAM
- Video card: DirectX 11-capable video card with at least 512 MB VRAM

#### **Recommended System requirements:**

- Windows 7 / 8 / 10 (64 Bit), Linux or Mac OS X 10.10\*
- Multicore Processor (CPU): Quad Core 3,0 GHz or higher
- Minimum 16 - 24 GB RAM or higher
- Video Card: DirectX 12-capable video card with at least 4 GB VRAM

\* XPlane 11 does not support PowerPC-based Macs or versions of OS X prior to 10.10.
